# Wireless Connectivity Dependable End-to-End Solutions

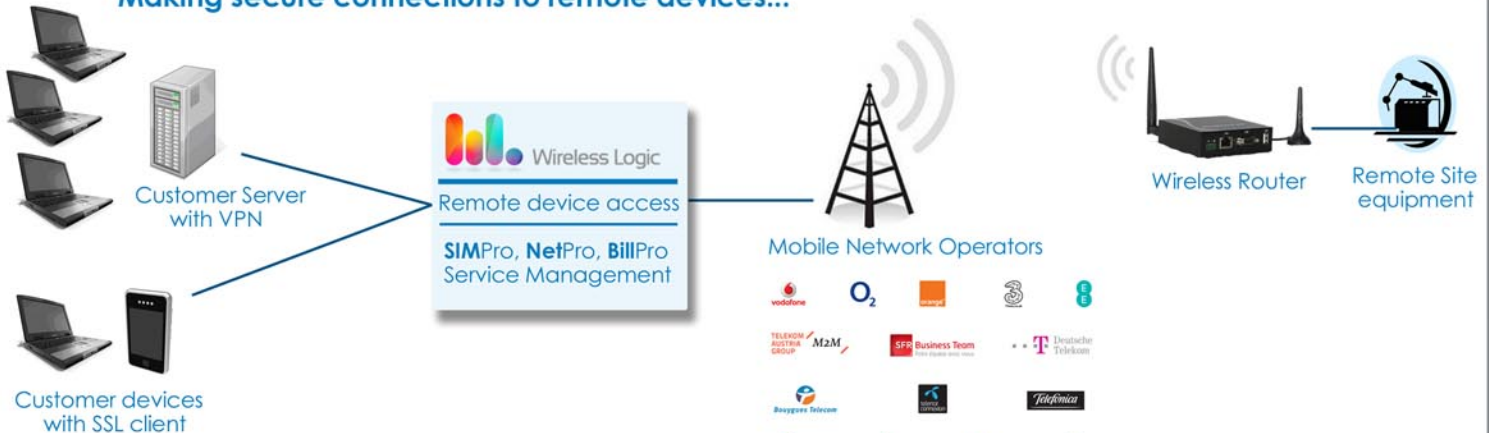

ACTE brings together class-leading suppliers in the M2M market to provide secure, dependable connectivity solutions. ACTE provide hardware platforms, accessory kits and the knowledge that you will have an end-to-end working solution while remaining in control of the M2M managed services.

**Robustel** 2G, 3G & 4G/LTE Routers include extensive management, networking and security features to deliver industrial-grade M2M connectivity at an unrivalled price-performance point. The R3000-Lite rugged cellular router provides dependable state-of-the-art mobile connectivity for M2M industrial monitoring applications. R3000-Lite Key features include:

- Virtual Private Network (VPN) Tunnel support
- Dual SIM capability for continuous cellular connections
- Auto-reboot via verified SMS, Caller ID or daily timed
- Interfaces: RS232, RS485, USB and Ethernet
- Flexible management via Web/CLI/SNMP or RobustLink Centralised Management Platform
- Strong metal enclosure, mounting point for optional DIN Rail or Wall mounting bracket
- Wide input voltage 9 to 26VDC and -40 to 85 Deg. C operating temperature range

## Making secure connections to remote devices...

## ACTE's Complete Starter Kit - Everything required for just £249
