

Inputs

TinyMesh

- Eight Individually programmable Inputs / Outputs
- Separate Pulse Counter Input
- Configurable Debounce Timing for Digital Inputs and Pulse Counter
- Configurable Sampling Intervals for Analog Inputs
- Configurable Trigger Hysteresis for Analog Inputs
- Built-in Temperature- and Voltage level sensors
- Automatic triggered messages on configurable input condition
 - Digital input change
 - Analog Input Change
- Automatic, Time Generated Input Status Reporting
- Polled Status Reporting by command
